

## Celeb-spiration: 4 Hot Hair and Makeup Looks to Try Now

### 1. **Tori Kelly**

"Tori was blessed with lots of beautiful naturally curly hair and when you have curly hair, the most important thing is to keep it healthy and use products that support the natural texture," says stylist Nikki Providence.

Follow Providence's directions below to get the look:

1. [Matrix Biolage Cleansing Conditioner](#) is great to prep hair like Tori's because it cleans the hair without stripping its natural oils.
2. When her hair was wet, I applied [Matrix StyleLink Volume Builder](#) at the roots.

3. Next, spread a generous amount of [Matrix StyleLink Smooth Setter](#) with a few drops of [Matrix StyleLink Volume Booster](#) at the roots throughout mid lengths making sure to distribute it evenly through the ends.
4. Part the hair deeply on one side. Take 2-inch sections of hair and twist them into ropes — diffuse gently without disturbing the twists, until the hair is completely dry.
5. Using your hands, shake the hair out at the roots to boost volume and separate the curls slightly. If any areas need a boost, now is the time to use a medium sized curling iron to touch up waves — make sure to keep the natural movement in the hair, don't make every section uniform!
6. At the roots, use [Matrix StyleLink Height Riser](#), and finish with [Matrix StyleLink Volume Fixer](#) to keep the volume through red carpet and performance!
